SUMMARY

Full Stack Developer specializing in the MERN stack, with hands-on experience building web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing responsive user interfaces, designing RESTful APIs, integrating databases, and building end-to-end web solutions.

Bringing over 4 years of experience in enterprise application support and software environments, with strong expertise in SQL, production support, incident resolution, and system analysis. Experienced in troubleshooting critical issues, supporting business applications, and working with cross-functional teams to ensure reliable system performance.

Combining enterprise experience with modern full-stack development skills to build scalable and user-friendly applications. Actively seeking Full Stack Developer opportunities in Dubai and the UAE.

PROFESSIONAL SKILLS

- **Frontend Development**

React.js, JavaScript, HTML5, CSS3, Bootstrap, JSON, TypeScript, Next.js, Material UI

- **Backend Development**

Node.js, Express.js, RESTful API Development, Authentication & Authorization, Server-side Validation.

- **Database Technologies**

MongoDB, PostgreSQL, SQL Server, MSSQL, Mysql

- **Version Control & Tools**

Git, GitHub, Confluence

- **Cloud & Platforms**

AWS, GCP

- **Programming & Scripting**

JavaScript, PowerShell, Bash

- **Testing & Debugging**

Manual Testing, API Testing, Debugging & Troubleshooting, Log Analysis

- **Professional Strengths**

SDLC, Cross-functional Collaboration, Production-grade Application Handling, Performance & Reliability Focus

EXPERIENCE

Employer 1: [Upcode, India](#)

Position: [Mern Stack Developer](#) from 2025-present

- Gaining practical experience in full-stack development using the MERN stack (MongoDB, Express.js, React.js, Node.js) by building modular and scalable web applications.
- Creating responsive user interfaces with React.js, JavaScript (ES6+), HTML5, and CSS3, focusing on usability and performance.
- Developing and integrating RESTful APIs using Node.js and Express.js, implementing CRUD functionality and server-side validation.
- Designing MongoDB schemas and managing data collections with proper integration into backend services.

- Implementing authentication and authorization using JWT (JSON Web Tokens) to secure application access and manage user sessions.
- Participating in full development lifecycle activities including requirement analysis, UI development, backend integration, and testing.
- Using Git and GitHub for version control, collaboration, and maintaining clean development workflows.
- Leveraging prior production support experience to debug issues effectively and improve application stability and performance.

Employer 2: Accenture Solutions Private Ltd, India

Position: **Application Development Analyst** from 2021- 2025

- Contributed to the development, enhancement, and maintenance of enterprise web applications, working across front-end and back-end components.
- Developed and modified application features using React, JSON, JavaScript, HTML, CSS, and Bootstrap, ensuring functional and UI improvements aligned with business requirements.
- Designed, tested, and deployed backend logic and database changes using SQL Server, MySQL, and MSSQL, with a focus on data integrity and performance.
- Independently handled monthly change requests, including requirement analysis, code development, unit testing, and deployment in both local and production environments.
- Performed debugging, root-cause analysis, and performance optimization by analyzing logs, monitoring errors, and resolving application defects.
- Collaborated with cross-functional teams to implement preventive fixes and system enhancements, reducing recurring production issues.
- Worked with Git-based version control to manage code changes and ensure seamless integration into CI/CD workflows.
- Supported and enhanced cloud-hosted applications deployed on GCP, executing deployments and automation scripts using PowerShell.
- Acted as a technical point of contact for internal web applications, guiding L2/L3 teams on application behavior, fixes, and enhancements.
- Maintained technical documentation, including code changes, deployment steps, and standard operating procedures.

Employer 3: Nuroil Trading LLC, Sharjah

Position: **Application Developer** 2020

- Worked closely with HR stakeholders and end users to gather requirements and design full-stack application modules for an internal HRMS platform.
- Developed and maintained web application features including onboarding, leave management, performance tracking, and payroll workflows.
- Contributed to backend service development by implementing business logic and data access layers, ensuring scalable architecture and efficient integration with SQL-based databases.
- Designed and managed relational database schemas in SQL Server, including table creation, data validation, and query optimization.
- Integrated the application with external and legacy systems to ensure seamless data flow and consistency across departments.
- Performed end-to-end testing, bug fixing, and application debugging to ensure reliability and smooth production releases.
- Designed and generated dynamic reports and dashboards to support HR decision-making and business insights using enterprise reporting solutions.
- Documented application features, workflows, and deployment steps, supporting maintainability and future enhancements.

CERTIFICATIONS

- **ITIL® Foundation Certification**(April 2025 to April 2028), Issuing Organization: PeopleCert
- **PL-300: Power BI Data Analyst**(Jan 2025 to Jan 2026), Issuing Organization: Microsoft
- **GitHub Copilot Certification**(March 2025 to March 2028), Issuing Organization: GitHub

EDUCATION

Thejus Engineering College: Bachelor of Engineering - Computer Science (2015 – 2019), CGPA: 7.11

Government Polytechnic College, Chelakkara: Diploma in Hardware Engineering (2013 - 2016), CGPA: 8.64

SOFT SKILLS

- Excellent verbal and written communication skills.
- Good Logical, Analytical, and Computational skills.
- Good managerial skills, interpersonal relations & ability to work individually as well as in a team.
- Excellent observation skills
- Self-starter.
- Problem solving skills.
- Ability to develop clear and concise documentation.
