SUMMARY

Full Stack Developer with hands-on MERN stack experience (MongoDB, Express.js, React.js, Node.js) building responsive UIs, RESTful APIs, JWT secured authentication, and end-to-end web applications, backed by 4+ years in enterprise software environments at Accenture, including SQL, production support, and incident resolution. Comfortable owning a feature from requirement through deployment, debugging production issues quickly, and working across cross-functional teams. Based in Sharjah with independent UAE work authorization, actively seeking Full Stack, MERN, or Frontend Developer roles in Dubai and across the UAE.

PROFESSIONAL SKILLS

- **Frontend Development:** React.js, JavaScript, HTML5, CSS3, Bootstrap, JSON, TypeScript, Next.js, Material UI, Redux, NPM
- **Backend Development:** Node.js, Express.js, REST API Development, JWT Authentication & Authorization, Server-side Validation.
- **Database Technologies:** MongoDB, PostgreSQL, SQL Server, MSSQL, MySQL.
- **Version Control & Tools:** Git, GitHub, Confluence.
- **Cloud & Platforms:** Google Cloud Platform, AWS, Vercel, Render.
- **Programming & Scripting:** JavaScript, PowerShell, Bash.
- **Testing & Debugging:** Manual Testing, API Testing, Debugging & Troubleshooting, Log Analysis.
- **Professional Strengths:** SDLC, Cross-functional Collaboration, Production-grade Application Handling, Performance & Reliability Focus.

EXPERIENCE

Employer 1: [Uppcode, India](#) - [Mern Stack Developer](#)

Nov 2025-present

- Build and ship modular, scalable features across the MERN stack (MongoDB, Express.js, React.js, Node.js), owning delivery from requirement analysis through deployment.
- Develop responsive, reusable React.js components (JavaScript ES6+, HTML5, CSS3), improving UI consistency and cutting duplicate frontend code across the application.
- Design and integrate RESTful APIs in Node.js/Express.js with full CRUD functionality and server-side validation, reducing invalid-data errors reaching production.
- Implement JWT-based authentication with protected routes, securing user sessions and access control across the application.
- Design MongoDB schemas and manage data collections integrated into backend services to support scalable data access.
- Apply prior production-support experience to debug issues faster and improve application stability, resolving defects proactively before they affect users.
- Collaborate via Git/GitHub with the engineering team, participating in code reviews to keep the codebase clean and maintainable.

Employer 2: [Accenture Solutions Private Ltd, India](#) - [Application Development Analyst](#)

Dec 2021- April 2025

- Delivered front-end and back-end features (React, JavaScript, HTML, CSS, Bootstrap) for enterprise web applications, translating business requirements into functional UI and logic changes each release cycle.
- Owned SQL Server, MySQL, and MSSQL backend logic and database changes end-to-end analysis, coding, unit testing, deployment, independently handling monthly change requests across local and production environments.

- Reduced recurring production issues by driving root-cause analysis, log/error monitoring, and preventive fixes in collaboration with cross-functional teams.
- Automated deployment and operational tasks for GCP-hosted applications using PowerShell scripts, streamlining release workflows.
- Served as primary technical point of contact for internal web applications, guiding L2/L3 support teams on defect triage, root cause, and fixes.
- Maintained Git-based version control integrated into CI/CD workflows and authored technical documentation covering code changes, deployment steps, and SOPs.

Employer 3: **Nuroil Trading LLC, Sharjah** - **Application Developer**

Jun 2020- Dec 2020

- Gathered requirements directly from HR stakeholders and end users to design full-stack modules for an internal HRMS platform covering onboarding, leave management, performance tracking, and payroll.
- Built backend business logic and data-access layers on SQL Server, designing and optimizing relational schemas for reliability at scale.
- Integrated the HRMS with external and legacy systems to keep data consistent across departments.
- Ran end-to-end testing and debugging ahead of production releases, and built dynamic HR reports and dashboards to support decision-making.

KEY PROJECT

E-Commerce Web Application (Full Stack – React, Node.js, PostgreSQL)

- Built a full-stack e-commerce web application with product browsing, cart, authentication, and order management features.
- Developed RESTful APIs using Node.js and Express for products, users, cart, and orders.
- Implemented JWT authentication with protected routes for secure user access.
- Used React with Redux for state management of cart and authentication.
- Designed PostgreSQL database schema for Users, Products, and Orders with sample data.

CERTIFICATIONS

- **ITIL® Foundation Certification** – **PeopleCert** (April 2025 to April 2028)
- **PL-300: Power BI Data Analyst** – **Microsoft** (Jan 2025 to Jan 2026)
- **GitHub Copilot Certification** – **GitHub** (March 2025 to March 2028)

EDUCATION

Thejus Engineering College: Bachelor of Technology - Computer Science Engineering (2015 – 2019), CGPA: 7.11

Government Polytechnic College, Chelakkara: Diploma in Hardware Engineering (2013 - 2016), CGPA: 8.6
